

We originally acquired satellite radio because we often go camping in wild mountainous areas with NO local radio or TV reception. It works splendidly even in the most remote areas and enables us to keep abreast of the current news, (in these dangerous times), as well as some entertainment when desired. We are delighted with the addition of instant weather as we like to keep aware of dangerous storms, ESPECIALLY in REMOTE areas, as it will be up to us alone to find appropriate shelter.

Frankly, I am very displeased that considering the first amendment, anyone could sensibly even question satellite radios freedom to broadcast or MY FREEDOM TO HEAR IT. I can choose to listen to many different broadcast formats for different reasons. We often choose XM satellite radio as THEY ARE THE ONLY RECEPTION AVAILABLE. I PAY for this service just the same as I pay for cable TV & Cable Internet. I want to keep connected to the rest of the world. I am a very satisfied customer!
